Flexible, Intuitive, Easy-To-Use

Award-Winning Encryption Software Cryptomator Released in Version 1.5.0 /// Brand-New User Interface /// Secure Remote Working With Documents in the Cloud

Bonn, Germany – April 17, 2020 – The encryption software Cryptomator, which protects cloud data from unauthorized access, receives with version 1.5.0 a new update today. In addition to improvements to the existing vault format, which increases the compatibility of Cryptomator with the variety of cloud services, there are far more obvious changes:

The user interface was not only redesigned, but completely rewritten. During the rewrite, a whole new code structure was planned which makes it easier to extend the application in the future and at the same time improves the onboarding for new developers.

Focus on Users – New User Interface Convinces With Improved Usability

One of the many goals of the redesign was to rethink the vault creation process to make it as easy as possible for new users to understand: “To make this possible, we visited and organized numerous usability test sessions. This not only allowed us to understand misconceptions in the usage of certain functions, but also to adapt our workflows accordingly,” explains Sebastian Stenzel, CTO of Skymatic.

The result: The new user interface not only convinces with a clear and understandable design. “The software is now also much more intuitive to use,” says Tobias Hagemann, CEO of Skymatic.

Cryptomator comes with a new “dark mode”, which will delight many users. The website with further information on Cryptomator also has a new design from today: <https://cryptomator.org>

Until April 23: 40 Percent Discount on Mobile Apps

The company is celebrating the relaunch with an exclusive offer for new customers: The mobile apps from Cryptomator for iOS and Android are available for €5.99 instead of €9.99.

In addition, the app for Android can now be downloaded as an APK version from the company's own online store: <https://cryptomator.org/android/>

About Skymatic

Skymatic helps companies and private users to achieve maximum security in the digital world by developing user-friendly encryption technologies. The company offers the software Cryptomator as well as cryptographic libraries, customized solutions, and consulting services. Cryptomator was awarded the *CeBIT Innovation Award for Usable Security and Privacy* by the Ministry of Education in 2016.
