Cryptomator Hub Released for Production Use

End-to-End Encryption for Cloud Storage in Organizations /// Zero-Knowledge Solution for Access Management of Cryptomator Vaults /// Secure Usage of Cryptomator Vaults Now Possible in Teams

Bonn, Germany – November 3, 2022 – Cryptomator Hub, the team and enterprise solution for Cryptomator, has been released in its first final version 1.0.0. It enables a secure way to work in teams with confidential and sensitive files for any cloud storage.

Cryptomator Hub is based on the same concept of a vault, a secure file storage for syncing to the cloud with end-to-end encryption. New is that Hub replaces the vault password with a central access management.

Individual access to Cryptomator vaults is secured through server-side authentication and key management. Hub manages key material based on a zero-knowledge solution without getting in touch with unencrypted keys.

Cryptomator Hub is also fully open source. The self-hosted solution is delivered as a software container and can be deployed using Kubernetes or Docker. Hub can be connected to an existing identity infrastructure of the company, such as Active Directory, single sign-on via OAuth or OpenID Connect.

“With Cryptomator Hub, we have fulfilled a major request from our customers,” says Tobias Hagemann, co-founder and CEO of Skymatic. “Cryptomator is now finally ready for enterprise use.”

Hub can be used for free for up to 5 team members. For larger teams and companies, an annual license can be purchased through the website at \$6.00 per seat per month. Until the end of the year, there is a promotional discount that gives 25% off for the first year.

About Skymatic

Skymatic helps companies and private users to achieve maximum security in the digital world by developing user-friendly encryption technologies. The company offers the software Cryptomator as well as cryptographic libraries, customized solutions, and consulting services. Cryptomator was awarded the *CeBIT Innovation Award for Usable Security and Privacy* by the Ministry of Education in 2016.
